LANGUAGE POSTCARDS · V2 DESIGNS

What the new postcard designs need from us

Ten postcard sides in the v2 designs, checked one by one against the artwork we hold. Five designs use artwork we do not have in any form; seven landing pages need their illustration swapped.

Prepared **17 September 2026** Designs checked **10 sides / 5 PDFs** Assets compared **16**

First, the thing that changes how you read the rest

The illustration files in `incoming` are **byte-for-byte identical to the previous delivery** — all sixteen of them. No updated artwork has actually been supplied. Every change described below exists **only inside the v2 PDFs**, so the artwork in Table 1 has to be requested from the designer as editable files before that work can start. The background images and the University logo are likewise unchanged, so the header and footer bands need nothing.

Table 1 — Designs we have no asset for

Five of the ten sides. The first three are the same underlying drawing in three different colourways, so they may be one request to the designer rather than three.

MAIN TITLE	ARTWORK		WHAT IS MISSING
English Intermediate & Advanced Conversation Hours	 v2 design	 nearest we hold	A ring of four figures with hands meeting in an **open white centre**, in **red with one navy-striped top**. We hold the same ring drawn **around a laid table** (cups, pastries, plates) in pink, coral and orange. The table and all its contents have been removed and every garment recoloured.
French, German & Spanish Advanced Conversation Hours	 v2 design	 nearest we hold	The same ring, again with no centre table, in a **navy, yellow, red and blue** colourway. This is a second recolour of the drawing above, distinct from both the English and the Portuguese versions.
Portuguese Intermediate and Advanced Conversation Hours	 v2 design	 nearest we hold	The same ring once more, no centre table, in **green, red, yellow and teal**. A third distinct colourway.
Conversation Exchange	 v2 design	 nearest we hold	Two people at a table. This is **identical to our Language Advising drawing** in pose, figures, furniture and colour — except that the **wall chart behind them has been removed**. Everything else matches line for line.

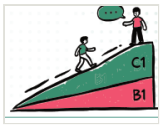

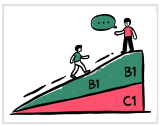

MAIN TITLE	ARTWORK		WHAT IS MISSING
Language Advising	 v2 design	 nearest we hold	The B1/C1 ramp with **corrected level labels**: **C1 on the upper green band, B1 on the lower pink band**. Our copy labels the green band **B1 twice** and puts **C1 on the lower pink band** — that is, it currently shows the advanced level as the lower one.

Table 2 – Illustrations to swap

Every landing page whose current illustration differs from its design. Three can be done immediately with assets already in hand; four wait on Table 1.

MAIN TITLE	STATUS	THE SWAP
Visit our Study Centre	READY NOW	Hero is `study-centre.svg`, which **contains the wrong drawing** (see the note below). The design uses the **book stack**, which we already hold, correct and unchanged, as `books.svg` — currently sitting further down the same page.
Portuguese Intermediate and Advanced Conversation Hours	READY NOW	Hero is `portuguese-conversation.svg`, which also **contains the wrong drawing**. Fixing the crossed pair is worth doing on its own account, though this page's final hero still needs the asset listed in Table 1.
Friends Without Frontiers	READY NOW	Hero is `conversation-at-table.svg` (five people at a table), but the design uses the **globe**. The globe is already on the page lower down as `globe.webp`; promote it, and replace the raster file with the **delivered vector version**, which is identical in appearance and will stay sharp at hero size.
English Intermediate & Advanced Conversation Hours	NEEDS TABLE 1 ASSET	Hero is `english-study-group.svg` (a classroom scene with speech bubbles). The design uses the recoloured ring.
French, German & Spanish Advanced Conversation Hours	NEEDS TABLE 1 ASSET	Hero is `fgs-group-table.svg` — the right drawing, but the **old version with the table and food**, in the wrong colours.
Conversation Exchange	NEEDS TABLE 1 ASSET	Hero is `hello-bonjour-signs.svg` (two people holding Hello/Bonjour placards). The design uses the two-at-a-table drawing.
Language Advising	NEEDS TABLE 1 ASSET	Hero is `language-advising.svg` (two people at a desk). The design uses the **ramp** — which we hold as `language-levels.svg`, currently on the Portuguese page, but with the levels mislabelled.

Two files with crossed contents

Worth separating out, because it is a straight error rather than a design change: `portuguese-conversation.svg` contains the **Study Centre** drawing (three people talking on stools), and `study-centre.svg` contains the **Portuguese Conversation** drawing (a library lounge interior). The contents are swapped relative to their names, and both files are in use, so **two pages currently show the wrong picture**. Everything else in our library matches the delivered originals.

Designs already correct

No action needed for these — the artwork on the page matches the v2 design exactly:

- **French, German & Spanish Intermediate Conversation Hours** — speech bubble
- **Study Abroad** — scooter and streetscape
- **Visit our Study Centre — artwork itself** — book stack (identical in both packs)

Method: each of the ten sides was rendered from its PDF and compared against every illustration we hold, matched on drawing, composition and colour. Files were also compared by checksum between the two deliveries. The empty `Iconography` folder in `incoming` is empty in the previous delivery too.
